EcoWash

Dissolves Oils & Biohazards

The Ultimate Chemical-Free Cleaner

EcoWash is the future of industrial cleaning—an eco-friendly, chemical-free, non-ionic surfactant designed to replace the toxic cleaners used today. This 100% organic solution breaks down oil, grease, and biohazards, making it the perfect choice for industries needing powerful yet safe cleaning solutions.

Whether you're tackling oil spills, wastewater treatment, or even shoreline cleanup, EcoWash is engineered to perform. It works with nature, not against it, breaking down contaminants at the molecular level into harmless elements like nitrates, carbon dioxide, and water. Safe for the environment and wildlife.

Key Benefits:

- Non-toxic and carcinogen-free
- Safe for use around wildlife and marine life
- Biodegradable, eco-friendly solution for tough industrial cleaning
- Works with nature to safely break down contaminants
- Safe for skin and the environment
- No PPE Required

EcoWash ensures a cleaner planet without the risks of harmful chemicals

Real-World Applications:

Water Petroleum Digestion | Wildlife Cleansing | Shoreline Wash | Vehicle & Boat Wash
Soil Remediation | Tar Removal | Industrial Cleaning | Wastewater Treatment | Grease Digestion
